

## GALAXY 2101 – K-1st Grade

### Finders, Seekers, Science Keepers Curriculum

Two year-long curricula help students in grades K and 1 become science seekers. Finders, Seekers, Science Keepers curricula help your students learn science by being totally engaged as young scientists. This program is both teacher-friendly and stimulates hands-on learning for students. Video characters invite students to share their ideas via the internet or fax.

Finders, Seekers, Science Keepers students undertake real-life science investigations with Marsi the Marsupial as the communicator, Digger the Bear as the observer, and Packy the Pack Rat as the collector and sorter. In their own basement laboratory, they set out to help people learn to explore science, their #1 mission in life.

Delivery Mode	Platform	Software	Length
Video, Hands-on, & Web	VHS & PC/Mac	Netscape & Internet Explorer	Full school year

#### Grade K – Red Version

- **Body Works:** Make the world's healthiest sandwich. Explore your senses with your senses. Try out balance and motion, and discover good hygiene that helps prevent the spread of germs.
- **Feed the Needs of Pets and Seeds:** Sprout seeds and make a garden. Build new homes for classroom animals and track an elusive escaped pet.
- **Twinkle, Twinkle Night-Time Sky:** Collect your own air and explore blowing winds. Rapidly changing weather makes for an unusual weather forecast and clearing skies at night reveal a beautiful moon and stars.

#### Grade 1 – Blue Version

- **Mixing, Dripping, Freezing Liquids:** Finding out what happens to a wet sign begins investigations that include pouring liquids, sinking and floating, a disappearing ice cube and a liquid that changes color.
- **Hear it, See it, Do it:** A mysterious sound sets up an exploration in which we "see" with sound. Students also make their own band, find different kinds of light and make their own shadow puppet show.
- **Critters at Work and Home:** Observe animal homes, build an aquarium, feed the birds, create your own camouflage, and discover "workings" of fossilized dinosaur teeth.
