

Integrate 101 – Introductory Level Technology Integration for Teachers

Integrate 101 is designed to immerse teachers in the roles computers and multimedia technology play in the classroom. Teachers are introduced to using technology in supporting all areas of the academic curriculum. Teacher Universe Curriculum Integration Specialists teach teachers how to use the basic tools of computing to create curriculum based, technology integrated activities. Participants are then led to further develop their own lesson plans for a particular academic discipline thereby incorporating the use of technology while addressing the academic goals and objectives of their curricula.

Credits Available from CSU-Monterey
