

Integrate 301 - Advanced Level

Technology-Rich Thematic Unit Design

Armed with the school's adopted curriculum standards, other curriculum alignment guides, textbooks, online and traditional supplemental materials, and previous lesson plans, teachers will develop thematic units based on the needs analysis they have completed earlier. Teachers are taught to lead students to pose essential questions in the spirit of inquiry learning, and then to design projects that respond to the essential question. The emphasis is on thematic unit planning and integrating all areas of curriculum. This also includes education reform concepts such as multiple learning styles, project-based and collaborative methods, and the support of problem solving and higher order thinking.

Assessments Included:

- Integrate Diagnostic Assessment
- Portfolio Assessment

Delivery Mode	Platform	Software	Length
Instructor-Led	PC/Mac	All	5 days/35 hours

Integrate 301 Includes:

Day 1: Curriculum Integration Project Lesson Plans

Day 3: How to Create a Thematic Unit

Day 2: Using the Internet to Enhance Teaching and Learning

Days 4 & 5: Developing Thematic Units
